

Suzy Easton

Cloud, DevOps, QA & Automation Engineer

AWS • Azure • Python • PowerShell • Cypress • GitHub Actions • Docker • CloudWatch • New Relic

Vancouver, BC | 604-719-6121 | suzyeaston@icloud.com | linkedin.com/in/suzyeaston | github.com/suzyeaston | suzyeaston.ca

Open to full-time or contract roles | Remote across Canada or Vancouver hybrid

01 PROFILE

Cloud and automation-focused technical systems professional with 12+ years across production IT, software delivery, QA engineering, cloud infrastructure, identity/security and applied AI. Hands-on with AWS and Azure, Python/PowerShell, GitHub Actions and CircleCI, Docker, SQS/SNS, CloudWatch and New Relic. Experienced automating operational work, supporting Linux and containerized services, troubleshooting Java/Node applications, hardening systems and partnering with development, QA, security and infrastructure teams. Also a musician who toured professionally as a bassist and recorded with Steve Albini - direct experience working calmly with creative teams under production pressure.

02 CLOUD & PLATFORM TOOLKIT

CLOUD	AWS S3, Lambda, SNS/SQS, CloudWatch, RDS, Redshift, EC2, IAM, Systems Manager; Azure Static Web Apps, Container Apps, VMs, Key Vault, Entra ID
AUTOMATION & DELIVERY	Python, PowerShell, Bash, JavaScript/TypeScript, GitHub Actions, CircleCI, Docker, Git, REST APIs, Node.js/npm
QA & TEST	Cypress, CircleCI, GitHub Actions, JavaScript test automation, REST API testing, SQL/SOQL validation, New Relic, Rollbar, production investigation, migration QA
OBSERVABILITY & OPERATIONS	CloudWatch, New Relic, Rollbar, KQL, custom monitoring/alerts, log and network analysis, incident investigation, runbooks, Jira/ServiceNow
SECURITY & SYSTEMS	Linux, Windows Server, VMware, IAM/SSO/SCIM, Key Vault, Defender, vulnerability remediation, SOC 2-aligned controls, DNS/DHCP, SSL/TLS, SQL

03 PROFESSIONAL EXPERIENCE

Quercus IT Inc.

May 2026 - Jul 2026

Canada / remote

AI Strategist & Solutions Engineer

- Sole architect and developer of Godwit, a working multi-tenant AI workflow control plane built on Azure Static Web Apps, Azure Container Apps and Azure OpenAI for internal and client-facing managed-service use.
- Designed role-aware workflows, governed execution, sensitivity-based policy/model routing and run/evidence capture; used Azure identity patterns and Key Vault-backed secret handling to support security-aware delivery.
- Worked through GitHub to ship application code and technical documentation, and investigated REST API integration failures where undocumented vendor fields required hands-on testing and fault isolation.

Alida

Jul 2024 - Apr 2026

Vancouver, BC

Senior IT Operations Analyst

- Built substantial Python, PowerShell and KQL automation for identity lifecycle, reporting, data validation, alerts, security checks and operational monitoring, including API-driven workflows across Microsoft and business systems.
- Managed AWS-hosted Linux infrastructure through Systems Manager, IAM and SSH over VPN; supported Azure VMs, Key Vault, hybrid Active Directory/Entra identity and SAML federation into AWS IAM roles.
- Automated endpoint delivery and vulnerability remediation with PowerShell, Intune and Defender; handled patching, OS hardening and security controls contributing to successful audits and SOC 2-aligned operations.
- Configured and troubleshoot SSO/SCIM integrations and authentication/provisioning failures across SAML, OAuth, JWT, LDAP and Microsoft Graph, partnering with Security, infrastructure, development and application teams.
- Documented changes and runbooks, participated in weekly security reviews and formal change control, and supported senior incidents across Linux, Windows, DNS/DHCP, SSL/TLS, SQL/ODBC and SaaS dependencies.

WineDirect

Jun 2022 - Jul 2024

Vancouver, BC

Software Quality Assurance Engineer

- Built Cypress/JavaScript automation in GitHub Actions and CircleCI across multi-tenant web, mobile, POS, payment and backend services; created a faster frontend suite developers could run without the full Java stack.
- Tested Node.js/npm modules, Java services, REST APIs and transactional workflows; used Docker, SQL/SOQL, browser/network inspection and backend evidence to isolate failures across application and data layers.
- Worked with AWS S3, Lambda, SNS/SQS, CloudWatch, RDS and Redshift; built custom CloudWatch monitoring and used New Relic and Rollbar for production investigation, migration QA and performance troubleshooting.
- Detected dropped, duplicated and mismatched transactional records before wider customer impact; documented blast radius and produced actionable defects for engineering across concurrent releases.

WineDirect

Sep 2021 - Jun 2022

Vancouver, BC

Level 2 Ecommerce Support

- Served as escalation point for complex production issues across ecommerce, POS, payments and APIs; diagnosed SSL/TLS, DNS, routing, sync and SQL/data failures using New Relic, Rollbar and network analysis.
- Partnered with engineering, product and third-party teams on hotfixes, regression checks and durable fixes for distributed winery retail environments.

WineDirect

Feb 2021 - Sep 2021

Vancouver, BC

Ecommerce Client Success Specialist

- Supported a ColdFusion-based ecommerce platform across POS, APIs, mobile and web; configured payment gateways, shipping carriers, DNS and production dependencies, then progressed into Level 2 support and QA engineering.

04 EARLIER INFRASTRUCTURE & PRODUCTION EXPERIENCE

Western Forest Products / Ignite Technical Resources

Mar 2020 - Dec 2020

Vancouver, BC

Project Support Analyst

- Automated OneDrive/SharePoint migrations with PowerShell and supported Intune/MDM, Azure AD Premium, MFA/YubiKey and endpoint configuration during a rapid enterprise remote-work shift.
- Served as a technical escalation point for remote enrolment and configuration issues and created practical documentation, emails and videos for a geographically distributed workforce.

Crisis Intervention and Suicide Prevention Centre of BC

Sep 2019 - Mar 2020

Vancouver, BC

Level 3 IT Help Desk Coordinator / Acting System Administrator

- Owned day-to-day administration and after-hours response for a 24/7 environment spanning Windows, Active Directory/Azure AD, VMware, firewalls, VPN/MFA, DNS/DHCP, public SSL certificates, WSUS patching and web infrastructure.
- Approved and deployed updates, automated Windows configuration, migrated Windows 7/8.1 systems to Windows 10 and rebuilt laptops during an urgent remote-work transition.
- Maintained VMware hosts, investigated security and WAN/LAN failures, and helped migrate telephony to SIP trunking with approximately 20 individually routed Avaya endpoints.

DHX Media

Mar 2018 - Oct 2018

Vancouver, BC

Help Desk & Development Support

- Supported deadline-driven animation, VFX and Avid editorial/audio production environments; built role-specific workstations and troubleshoot Windows images, AD, GPUs, Wacom devices, storage, networks and studio software.
- Maintained deployable Windows images, Active Directory computers/OUs and production-software licensing, and assisted with MEL/Python-adjacent investigation for rendering reliability.

05 MUSIC & EDUCATION

MUSIC

Musician, professional bassist and recording artist; toured professionally and recorded with Steve Albini. Live and studio work informs calm troubleshooting, collaboration and delivery under pressure.

EDUCATION

West Vancouver Secondary School - graduated 2000 | Douglas College - Music Technology Certificate | Columbia Academy - Digital / Analog Recording Arts | University of Victoria - Mathematics coursework
